JIRA Portfolio功能简介

💡 *计划将业务简单化：跨项目、跨团队也能即时响应业务。*

Control your roadmap

blocked URLWe've made it easy to quickly plan and scope your roadmap across multiple JIRA projects. Put shared resources, dependencies and deliverables into one plan to get a consolidated view of your entire roadmap.

Avoid bottlenecks

blocked URLIdentify and avoid bottlenecks and potential holdups by accounting for dependencies across teams and projects. Model skills and define who can do which type of work to avoid unrealistic resource loads.

Plan automatically

blocked URLIntegrate a project or product release into your existing roadmap. Set priorities, estimates and target dates to instantly see when you can ship releases based on your commitments.

Keep up with change

blocked URLAdjust delivery dates, team member resources and dependencies to give a real-time comprehensive view of the status of all of your projects.

Powered by JIRA

JIRA Portfolio integrates and syncs with JIRA to create a seamless flow between your existing JIRA issues and your roadmaps.
